

proudly donates to the Kidney Association of Belize on

# World Kidney Day

The World Kidney Day logo consists of two stylized human kidneys in blue, connected by a curved orange line that represents the ureters.

## Atlantic Bank Donates to the Kidney Association of Belize in Observance of World Kidney Day

In observance of World Kidney Day, Atlantic Bank Limited is proud to announce a donation to the Kidney Association of Belize, reaffirming the Bank's commitment to supporting organizations that play a vital role in assisting individuals living with kidney disease.

Kidney disease continues to affect many Belizean families and often develops silently without early symptoms. Through this contribution, Atlantic Bank aims not only to support the important work of the Association, but also to encourage the public to become more informed about kidney health. Increasing awareness, maintaining healthy lifestyles, and seeking regular medical checkups are important steps that can help reduce the risk and impact of kidney disease.

The Kidney Association of Belize continues to make a meaningful difference through programs focused on patient support, education, and improved access to treatment and care. Their work provides critical assistance and guidance to patients and their families as they navigate the challenges associated with kidney disease.

Atlantic Bank remains committed to giving back and supporting initiatives that promote healthier, stronger communities across Belize.
